Course guide
200101 - FVC - Complex Variable Functions

Unit in charge: School of Mathematics and Statistics
Teaching unit: 749 - MAT - Department of Mathematics.

Degree: BACHELOR'S DEGREE IN MATHEMATICS (Syllabus 2009). (Compulsory subject).
Academic year: 2022  ECTS Credits: 7.5  Languages: Catalan, Spanish

LECTURER
Coordinating lecturer: ORIOL SERRA ALBO
Others:
Segon quadrimestre:
JORDI GUARDIA RUBIES - CFIS, M-A, M-B
CLÉMENT REQUILÉ - CFIS, M-A, M-B
ORIOL SERRA ALBO - CFIS, M-A, M-B

L'idioma d'impartició d'aquesta assignatura canvia depenent del professor
El idioma de impartición de esta asignatura cambia dependiendo del profesor que la imparta
The teaching language of this subject depends on the professor who teaches it

DEGREE COMPETENCES TO WHICH THE SUBJECT CONtributes

Specific:
1. CE-2. Solve problems in Mathematics, through basic calculation skills, taking in account tools availability and the constraints of time and resources.
2. CE-3. Have the knowledge of specific programming languages and software.
3. CE-4. Have the ability to use computational tools as an aid to mathematical processes.

Generic:
4. CB-1. Demonstrate knowledge and understanding in Mathematics that is founded upon and extends that typically associated with Bachelor's level, and that provides a basis for originality in developing and applying ideas, often within a research context.
5. CB-2. Know how to apply their mathematical knowledge and understanding, and problem solving abilities in new or unfamiliar environments within broader or multidisciplinary contexts related to Mathematics.
6. CB-3. Have the ability to integrate knowledge and handle complexity, and formulate judgements with incomplete or limited information, but that include reflecting on social and ethical responsibilities linked to the application of their knowledge and judgements.
7. CG-1. Show knowledge and proficiency in the use of mathematical language.
8. CG-2. Construct rigorous proofs of some classical theorems in a variety of fields of Mathematics.
9. CG-3. Have the ability to define new mathematical objects in terms of others already know and ability to use these objects in different contexts.
10. CG-4. Translate into mathematical terms problems stated in non-mathematical language, and take advantage of this translation to solve them.
12. CG-6 Detect deficiencies in their own knowledge and pass them through critical reflection and choice of the best action to extend this knowledge.

Transversal:
11. SELF-DIRECTED LEARNING. Detecting gaps in one's knowledge and overcoming them through critical self-appraisal. Choosing the best path for broadening one's knowledge.

TEACHING METHODOLOGY

There are three one hour lectures and two one hour problem sessions per week.
LEARNING OBJECTIVES OF THE SUBJECT

Introduce the holomorphic functions of one complex variable.
Apply the theorem of Cauchy and the winding number to the computation of integrals by residues.
Operate with power series, discuss the radius of convergence and the behaviour on the boundary.
Discuss applications of holomorphic functions.

STUDY LOAD

Total learning time: 187.5 h

CONTENTS

The Complex Plane

Description:
Complex numbers (representation, basic properties, successions, series). The complex plane and its topology.

Full-or-part-time: 7h
Theory classes: 3h
Practical classes: 4h

Holomorphic functions

Description:

Full-or-part-time: 16h
Theory classes: 10h
Practical classes: 6h

Local Cauchy theory

Description:

Full-or-part-time: 16h
Theory classes: 10h
Practical classes: 6h
Global Cauchy theory

Description:

Full-or-part-time: 19h
Theory classes: 11h
Practical classes: 8h

Additional topics: Conformal applications, harmonic functions, z-Riemann function, approximation of meromorphic functions, analytic prolongation.

Description:

Full-or-part-time: 17h
Theory classes: 11h
Practical classes: 6h

GRADING SYSTEM

There will be a mid-term exam (ME) and a final exam (FE).
The final grade (NF) will be given by the formula NF = max( FE ; 0.3 * ME + 0.7 * FE ).

An extra exam will take place on July for students that failed during the regular semester.
