Course guide
200122 - GD - Differential Geometry

Unit in charge: School of Mathematics and Statistics
Teaching unit: 749 - MAT - Department of Mathematics.
748 - FIS - Department of Physics.
Degree: BACHELOR'S DEGREE IN MATHEMATICS (Syllabus 2009). (Compulsory subject).
Academic year: 2023  ECTS Credits: 7.5  Languages: Catalan

LECTURER

Coordinating lecturer: JOSE BURILLO PUIG

Others: Segon quadrimestre:
JOSE BURILLO PUIG - M-A, M-B
MARIA IMMACULADA GALVEZ CARRILLO - M-A
FRANCESC XAVIER GRACIA SABATE - M-A, M-B

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
1. CE-2. Solve problems in Mathematics, through basic calculation skills, taking into account tools availability and the constraints of time and resources.
2. CE-3. Have the knowledge of specific programming languages and software.
3. CE-4. Have the ability to use computational tools as an aid to mathematical processes.

General:
5. CB-1. Demonstrate knowledge and understanding in Mathematics that is founded upon and extends that typically associated with Bachelor's level, and that provides a basis for originality in developing and applying ideas, often within a research context.
6. CB-2. Know how to apply their mathematical knowledge and understanding, and problem solving abilities in new or unfamiliar environments within broader or multidisciplinary contexts related to Mathematics.
7. CB-3. Have the ability to integrate knowledge and handle complexity, and formulate judgements with incomplete or limited information, but that include reflecting on social and ethical responsibilities linked to the application of their knowledge and judgements.
8. CG-1. Show knowledge and proficiency in the use of mathematical language.
10. CG-3. Have the ability to define new mathematical objects in terms of others already known and ability to use these objects in different contexts.
11. CG-4. Translate into mathematical terms problems stated in non-mathematical language, and take advantage of this translation to solve them.
12. CG-6 Detect deficiencies in their own knowledge and pass them through critical reflection and choice of the best action to extend this knowledge.

Transversal:
4. SELF-DIRECTED LEARNING. Detecting gaps in one's knowledge and overcoming them through critical self-appraisal. Choosing the best path for broadening one's knowledge.

TEACHING METHODOLOGY

(Section not available)

LEARNING OBJECTIVES OF THE SUBJECT

(Section not available)
STUDY LOAD

<table>
<thead>
<tr>
<th>Type</th>
<th>Hours</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours small group</td>
<td>30,0</td>
<td>16.00</td>
</tr>
<tr>
<td>Self study</td>
<td>112,5</td>
<td>60.00</td>
</tr>
<tr>
<td>Hours large group</td>
<td>45,0</td>
<td>24.00</td>

Total learning time: 187.5 h

CONTENTS

1. Plane and space curves

Description:

Full-or-part-time: 37h 30m
Theory classes: 9h
Laboratory classes: 6h
Self study : 22h 30m

2. Surfaces

Description:

Full-or-part-time: 37h 30m
Theory classes: 9h
Laboratory classes: 6h
Self study : 22h 30m

3. Gauss Curvature

Description:

Full-or-part-time: 37h 30m
Theory classes: 9h
Laboratory classes: 6h
Self study : 22h 30m
### 4. Examples of surfaces

**Description:**

**Full-or-part-time:** 12h 30m  
Theory classes: 3h  
Laboratory classes: 2h  
Self study : 7h 30m

### 5. Fundamental equations of surface theory

**Description:**

**Full-or-part-time:** 25h  
Theory classes: 6h  
Laboratory classes: 4h  
Self study : 15h

### 6. Geometry on a surface

**Description:**
Covariant derivative and parallel transport. Geodesics, geodesic curvature, Liouville's formula. The exponential map, minimality properties of geodesics. Sums of the angles of a spherical triangle; Gauss-Bonnet's theorem and applications.

**Full-or-part-time:** 22h 30m  
Theory classes: 5h  
Laboratory classes: 4h  
Self study : 13h 30m

### 7. Introduction to differential manifolds

**Description:**

**Full-or-part-time:** 15h  
Theory classes: 4h  
Laboratory classes: 2h  
Self study : 9h
GRADING SYSTEM

The subject mark will be obtained from:

ME: Midterm Exam
FE: Final Exam

by the following formula:

Final Mark = max( FE, 0.3 ME + 0.7 FE).

An extra exam will take place on July for students that failed during the regular semester.

EXAMINATION RULES.

The exams (ME and FE) will contain theoretical and practical questions.

Only a formulary will be allowed.
