Course guides
200161 - MD - Discrete Mathematics

Last modified: 31/05/2020

Unit in charge: School of Mathematics and Statistics
Teaching unit: 749 - MAT - Department of Mathematics.

Degree: BACHELOR’S DEGREE IN MATHEMATICS (Syllabus 2009). (Compulsory subject).

Academic year: 2020 ECTS Credits: 7.5 Languages: Catalan

LECTURER

Coordinating lecturer: ORIOL SERRA ALBO

Others: Segon quadrimestre:
      GUILLEM PERARNAU LLOBET - M-B
      JUAN JOSÉ RUE PERNA - M-A
      ORIOL SERRA ALBO - M-A, M-B

PRIOR SKILLS

The student must have acquired the contents of the first term degree in mathematics.

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
1. CE-2. Solve problems in Mathematics, through basic calculation skills, taking in account tools availability and the constraints of time and resources.
2. CE-3. Have the knowledge of specific programming languages and software.
3. CE-4. Have the ability to use computational tools as an aid to mathematical processes.

General:
4. CB-1. Demonstrate knowledge and understanding in Mathematics that is founded upon and extends that typically associated with Bachelor’s level, and that provides a basis for originality in developing and applying ideas, often within a research context.
5. CB-2. Know how to apply their mathematical knowledge and understanding, and problem solving abilities in new or unfamiliar environments within broader or multidisciplinary contexts related to Mathematics.
6. CB-3. Have the ability to integrate knowledge and handle complexity, and formulate judgements with incomplete or limited information, but that include reflecting on social and ethical responsibilities linked to the application of their knowledge and judgements.
7. CG-1. Show knowledge and proficiency in the use of mathematical language.
8. CG-2. Construct rigorous proofs of some classical theorems in a variety of fields of Mathematics.
9. CG-3. Have the ability to define new mathematical objects in terms of others already know and ability to use these objects in different contexts.
10. CG-4. Translate into mathematical terms problems stated in non-mathematical language, and take advantage of this translation to solve them.
12. CG-6 Detect deficiencies in their own knowledge and pass them through critical reflection and choice of the best action to extend this knowledge.

Transversal:
11. SELF-DIRECTED LEARNING. Detecting gaps in one's knowledge and overcoming them through critical self-appraisal. Choosing the best path for broadening one's knowledge.

TEACHING METHODOLOGY

STUDY LOAD

<table>
<thead>
<tr>
<th>Type</th>
<th>Hours</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours small group</td>
<td>30,0</td>
<td>16.00</td>
</tr>
<tr>
<td>Self study</td>
<td>105,0</td>
<td>56.00</td>
</tr>
<tr>
<td>Guided activities</td>
<td>7,5</td>
<td>4.00</td>
</tr>
<tr>
<td>Hours large group</td>
<td>45,0</td>
<td>24.00</td>
</tr>
</tbody>
</table>

Total learning time: 187.5 h

CONTENTS

1. Combinatorics

Description:
1.1 Enumerative Combinatorics

1.2 Recursions and Generating Functions

Full-or-part-time: 72h
Theory classes: 15h
Practical classes: 11h
Self study: 46h

2. Discrete Probability

Description:

Full-or-part-time: 25h
Theory classes: 6h
Practical classes: 4h
Self study: 15h
3. Graph Theory

Description:

3.1 Graphs

3.2 Trees

3.3 Eulerian and Hamiltonian Graphs

3.4 Matchings, Colorings and Planarity

Full-or-part-time: 64h
Theory classes: 16h
Practical classes: 10h
Self study: 38h

GRADING SYSTEM

The subject assessment will be based on a midterm exam P and a final exam F. The final grade will be 0.4P+0.6F.

The final exam will assess the topics not covered in the midterm; it will be possible to take an exam over the whole course material the day of the final exam.

An extra exam will take place on July for students that failed during the regular semester.
